amount of Five Thousand Five Hundred Sixty-Eight Dollars and Seventy-Five Cents (5568.75) for impact permit 86138.

On or about July 25, 2007, Purchaser advised Jefferson County that he had lost the receipt for the Sewer Impact to the buildi-

of the sewer impact permit, however, he was unable to locate the receipt for the sewer impact permit issued by the County's Permitting
Office. In lieu of the return of the receipt for the sewer impact permit issued by the County's Permitting Office the County is willing to
accept an indemnification agreement from the Purchaser as set forth below.

NOW THEREFORE, in consideration of the premises set forth above and below, the receipt and sufficiency of which as full
consideration is hereby acknowledged, the County and Purchaser hereby agree as follows:

   the permits identified if the prior paragraph.
3. Purchaser agrees to hold harmless, defend, and indemnify Jefferson County, Alabama, the Jefferson County
   Commission, and it's
   Department of Environmental Services, their agents and employees, from and against any claim, suit, or judgment
   and all cost and expenses in any way resulting from any individual or entity whatsoever asserting any right or
   benefit whatsoever, by or through impact permit number 86138 which is dated May,16, 2006 and is reflecting twenty-four
   point seventy-five (24.75) fixtures for a total fee of Five Thousand Five Hundred Sixty-Eight Dollars and Seventy-Five
   Cents ($5,568.75). And Purchaser agrees to pay Jefferson County up to the sum of 5,568.75 at the rate of $225.00

AGREEMENT FOR CONSTRUCTION MATERIALS TESTING
AND GEOTECHNICAL ENGINEERING SERVICES
FOR THE MORRIS KIMBERLY TRUNK SEWER AND PUMP STATIONS

This AGREEMENT made this day of , 2007, by and between Jefferson County, a County in the State of Alabama as party of the first part, hereinafter referred to as the COUNTY, and QORE Property Sciences as party of the second part, hereinafter referred to as the CONSULTANT.

WHEREAS, the said CONSULTANT has agreed and by these presents does agree with the COUNTY for consideration hereinafter mentioned, with payment to be administered by the COUNTY, to accomplish the construction materials testing, including necessary observations, testing and analysis, and reporting of findings, during construction of the Morris Kimberly Trunk Sewer and Pump Stations.

NOW THEREFORE, for and in consideration of the mutual covenants hereinafter stipulated to be kept and performed, it is agreed between the parties as follows:

ARTICLE 1  SCOPE OF WORK

The CONSULTANT, in the accomplishment of work under this AGREEMENT, shall provide construction materials testing, observation, and engineering reports to be submitted to the Jefferson County Environmental Services Department, hereinafter referred to as the PROJECT ENGINEER, for the construction of the Morris Kimberly Trunk Sewer and Pump Stations. For testing purposes, the project will consist of a geotechnical subsurface exploration and soil, concrete, foundation testing and observation.

Specifically excluded in the scope of work under the AGREEMENT is actual construction, repair, renovation or maintenance of the public works improvements by the CONSULTANT.

SECTION 1  OBLIGATION OF CONSULTANT TO COUNTY

The CONSULTANT shall perform the professional and engineering services as further described below:

A. GEOTECHNICAL ENGINEERING SERVICES

1. Perform 25 linear feet of soil test boring for access roadway at Pump Station No. 1 and 50 linear feet for access roadway at Pump Station No. 2. The borings will be located in the cut areas. The soil test boring will be drilled 10 feet below ground surface or auger refusal. Any areas that will require fill or areas that are at final subgrade elevation will be observed and evaluated using proofrolling with a fully loaded dump truck (provided by the grading contractor) by the Geotechnical Engineer.

2. Perform a soil and rock core boring for each of the wet wells located at Pump Station No. 1 and Pump Station No. 2. The borings will be advanced to approximately 30 feet below ground surface or corresponding to 10 feet below the bottom of the wet wells.

3. Perform three soil and rock core borings for Locust Fork River Crossing at Station 1+50.00, Station 2+50.00, and Station 9+00.00. These borings will be extended to EL 320, EL 270, and EL 390, respectively.

4. Total drilling for soil testing is budgeted to be 200 feet and total rock coring is budgeted for 180 feet. The following

ESTIMATED TOTAL FOOTAGE: 125 feet and 180 feet

5. Control sediment pollution around each of the boring locations for the Locust Fork River Crossing to minimize sediment runoff and discharge off from drilling operation.

6. The fieldwork will be performed under the supervision of a Geotechnical Engineer who will oversee field operations. If conditions are encountered that warrant additional changes to the planned field exploration, the engineer can readily make such changes. Often, changes to the field exploration allow for more thorough and economical geotechnical recommendations.

7. Laboratory tests will be performed as necessary on selected samples to establish the significant engineering characteristic and parameters of the soils and rocks. Given the anticipated site conditions, laboratory testing will consist of Atterberg Limits tests, grain size distribution, natural moisture content tests and unconfined compression tests for rock.

8. Perform document review at the State of Alabama Department of Industrial Relations Mining and Reclamation Division in an attempt to find documentation on underground mines.

9. Perform document review at the Alabama Department of Transportation Bridge Bureau at Montgomery Alabama in an attempt to find documentation on the existing bridge foundations for the Locust Fork River Crossing.

10. Provide geotechnical report which will include the following:

   - Records of test borings outlining the materials encountered at the test locations. Subsurface profiles between borings will also be provided.
   - Results of laboratory tests performed to provide information regarding the engineering characteristics of the subsurface materials.
   - Site preparation considerations for construction at the site. Emphasis will be placed on general engineering properties of on-site soils, bedrock conditions, weather considerations, general grading considerations, and the possible need for undercutting and replacement.
   - Lateral earth pressure coefficients for below grade walls.
   - Foundation recommendations for pump station structure(s). These will include bearing capacity, foundation type, and settlement potential.
   - Groundwater considerations, if encountered.
   - Pavement support recommendations based on assumed CBR value.
   - Anticipated conditions and construction considerations for directional bores.

B. CONSTRUCTION MATERIAL AND TESTING

1. Perform soil and aggregate base density testing on select fill for the proposed pump stations, backfill areas, parking areas and roadways around the pump station, using a nuclear gauge. Obtain samples of the proposed fill materials and deliver the samples to a laboratory for analysis when required.

2. Provide a geotechnical engineer or senior engineer to perform subgrade observations and provide other geotechnical recommendations during construction. Subgrade observations will consist of directing proofrolling observations. If soft or unsuitable soils are identified during proofrolling observations, the geotechnical engineer will recommend appropriate activities to the project engineer. The geotechnical engineer will also perform inspections of subgrade prior to the placement of concrete for footings and foundations.

3. Provide a technician to perform concrete tests (slump, air, and temperature tests) during the placement of concrete. Technician will cast concrete test specimens and deliver them to the laboratory for curing and compression tests.

4. Assign a project manager to the project, to help coordinate work on the project, and formally report results of tests and inspections. Reports of tests will be verbally issued at the time of the work, and will be issued formally on a weekly basis. Monthly progress meetings shall be attended.

SECTION 2 OBLIGATION OF THE COUNTY TO THE CONSULTANT

It is understood that the COUNTY will:

1. Assist the CONSULTANT by placing at their disposal all available information pertinent to the project, including
