AMENDMENT NO. 1

TO THE AGREEMENT for PROFESSIONAL ENGINEERING SERVICES for

Phase II Design, Bidding and Construction Services for the Cahaba River and Trussville WWTPs and Al Seier Pump Station

This is an Amendment to the Contract by and between Jefferson County, Alabama through the Environmental Services Department, hereinafter called “the OWNER” and CDM Smith Inc., hereinafter called “the CONSULTANT” to provide additional engineering services related to the Phase II Design, Bidding and Construction Services for the Cahaba River and Trussville Wastewater Treatment Plants (WWTPs) and Al Seier Pump Station.

WITNESSETH:

WHEREAS, Items were added to the design scope for the Cahaba River and Trussville WWTPs and the Al Seier Pump Station; and

WHEREAS, assistance is being provided for the negotiation and value engineering efforts to review and provide negotiation services with the single bidder on the Phase II design improvements project; and

WHEREAS, the CONSULTANT's level of effort for design services increased in response to the events described above; and

WHEREAS, the CONSULTANT's level of submittal review effort will increase due to changes in submittal review process agreed to with the general contractor during negotiation of value engineering cost credits; and

WHEREAS, the OWNER desires to amend the contract; and

WHEREAS, the CONSULTANT wishes to amend the contract.

NOW, THEREFORE, in consideration of the above, the parties hereto agree as follows:

The agreement between the parties, which was approved by Jefferson County Commission Stephens, President, and Jefferson County Commission on January 8, 2015, is hereby amended as follows:

I. AMENDMENT TO ARTICLE I, SCOPE OF WORK

Amend Article I, Scope of Work, and Section 1 as follows:

Task S5, Assistance with Negotiation and Value Engineering
This task includes assisting JCESD with negotiation and value engineering efforts with the single bidder (i.e., Brasfield and Gorrie) for the Cahaba River WWTP and Trussville WWTP Phase 2 Improvements. It is not possible to predict the level of effort for this task, so we propose establishing an allowance of sixty thousand dollars ($60,000.00). We also propose that CDM Smith provide periodic updates on expenditures and a summary of anticipated efforts to keep JCESD informed and in a position to redirect efforts if JCESD feels that adjustments are necessary.

Task D8, Additional Design Services

Items were added to the original design services task (Task D8) for the Trussville WWTP, Cahaba River WWTP, and the Al Seier Pump Station to improve system efficiency and lower costs. These are described below for each facility. CDM Smith provided JCESD with estimates for each task as the tasks were added to the list of requested additional items. The total estimated cost for the items to be added was One hundred sixty-four thousand one hundred fifty dollars ($164,150.00).

Trussville WWTP

The following tasks were added to the scope of design for the Trussville WWTP as requested by JCESD.

1. UV system electrical and instrumentation and control (I&C) platform canopy — This task included the design of an open sided cover over the electrical and I&C control platform to make working on the systems safer and more practical during storm events.
2. Add air conditioning to alum metering structure — This task includes adding air conditioning to the previously designed alum metering system fiber glass structure.
3. Permit modification for the generator — This task involved evaluating options for permitting of a generator for the facility and preparing calculations and a submittal package to apply for an air permit for the new system. CDM Smith identified approaches to permitting (i.e., backup generation versus supplemental power generation) and worked with JCESD to define the differences in equipment requirements and costs and to select the proposed approach.

Cahaba River WWTP

The following tasks were added to the scope of design for the Cahaba River WWTP as requested by JCESD.

1. Chlorination of plant water and filter flushing water — The original scope included design of a tablet chlorinator for the disinfection of plant water. The scope was changed to include chlorination of the filter backwash water as well and to use hypochlorite solution instead of a tablet chlorinator.
2. Bypass from filter flash mix to filter effluent wet well — The original scope included performing an evaluation to determine the best approach to retrofitting to eliminate interruption of plant water supply when filters are taken out of service. The evaluation concluded that installation of a bypass from the filter flash mix box to the filter effluent wet well was the best way to achieve this. This task included adding the design of this bypass to the scope.
3. Repair of leaks between the Biological Nutrient Removal (BNR) treatment trains — During the Phase 1 construction it was determined that water was leaking under the wall between the two BNR trains. This task included adding repair of the leaks to the design.
4. Repair of BNR aeration basin end walls — During the Phase 1 construction it was determined that the end walls abutting the aeration basin surface aerators had been damaged and the mixers on the bottom of the surface aerator shafts were gone due to corrosion. This task includes adding repair of these issues to the design.
5. Modify UV system upgrade scope — The original scope included replacement of controls for the UV system. CDM Smith evaluated options and identified a more advantageous option. The more advantageous option was implemented, but required slightly more design effort.
6. Add concrete containment to the alum system design — The alum system was originally designed with double wall tanks and pipes, but JCESD operation staff were uncomfortable with not having a concrete containment system around the storage and feed systems. This task included redesign to add the required containment.
7. Add a ferric feed system for the sludge pump station — The consultant who designed the sludge conveyance pipeline requested the addition of a ferric feed system for the discharge pipe to the sludge pump station. This task included design of that system.
8. Add cleaning of Cahaba Influent Pump Station wet well to the construction contract scope.
9. Add de-ragging of the Cahaba Influent Pump Station pumps and piping to the construction contract scope.
10. Removal of influent screening system entrance gate — During the Phase 1 construction it was determined that the slide gate at the entrance to the influent screening system was very badly corroded. This gate is redundant with the gates directly downstream of it, so it isn’t absolutely necessary. This item included addition of the removal of this gate to the construction contract scope.
11. Replacement of the existing grease pumps in the grit chamber grease system was added to the construction contract scope.
12. Redesign the influent screenings chute so it is steeper and add a bypass chute.
13. Add conduits to the two inside BNR oxidation ditch aerators to allow installation of oil pumps in the future.
14. Replace plant water piping at the BNR basins – The plant water piping hanging on the walls and walkways of the BNR basins is damaged from freeze events and other wear and tear. This task included adding the removal and replacement of the existing piping and addition of insulation and heat tracing to the construction contract scope.

15. Add air conditioning to the fiberglass enclosures for alum and ferric metering to the construction contract scope – These were originally designed with ventilation only. This task included redesign to add air conditioning.

16. Add proximity switches to the influent pump check valves to the construction contract scope.

17. Add oil level and pressure sensors for the hydraulic units associated with the influent pump station gates to the construction contract scope.

18. Add strap on flow meters to the influent pumps discharge pipes to improve control of the pumps during wet weather flows to the construction contract scope. The operating logic was also reworked to use this information.

19. Repair the middle influent gate in the UV structure – This gate leaks badly and dewatering of the structure is necessary make repairs. This was added to the construction contract scope and the maintenance of plant operation specifications were modified to lay out the logistics.

20. Add a tee, valve and cam lock connection to the sludge pump station discharge piping in the construction contract scope to allow pumping to a truck by JCESD operation staff if necessary.

21. Redesign the Influent Pump Station gate actuators and stems – The original scope included replacement of the Cahaba Influent Pump Station gate actuators and stems. After completion of design an idea for modification of the gate system rather than just replacement of the gate stems, operators and hydraulic system surfaced. The new approach would allow solving problems with corrosion and complex hydraulic systems. This task included implementing those ideas.

Al Seier Pump Station

The following tasks were added to the scope of the design as requested by JCESD.

1. Design a new seal water pumping system – This task involved designing a new seal water system to replace the existing seal water system. The new seal water system was located two levels above the existing system, which is on the bottom floor, which is prone to flooding.

2. Replace valve 7 – This task involved adding replacement of the 48” control valve on the discharge pipe to the Cahaba River WWTP including maintenance of facility operation considerations. This work was completed and then removed from the project once it was decided to do a complete rebuild of the existing Valve 7.

3. Add proximity switches to each of the five check valves – This task included addition of proximity switches and the necessary controls and logic to provide a failure if one of the pumps started and the check valve did not open.

Task G3A, Review of Shop Drawings and Other Submittals

Concessions made in the negotiation of value engineering credits with the proposed general contractor for the Cahaba River and Trussville WWTPs Phase 2 construction contract will result in increasing CDM Smith's shop drawing review effort. However, these concessions will also provide the contractor with better control of schedule and delivery for the project. CDM Smith assumes that the proposed changes will increase the number of submittals to be reviewed by 100 and will increase the cost of shop drawing review by $80,000.

II. AMENDMENT TO ARTICLE II, TIME OF BEGINNING AND END

This amendment increases the contract time by 6 months from 32 months to 38 months to account for Task D8 Additional Design Services and Task S5 Assistance with Negotiation and Value Engineering, identified above.

III. AMENDMENT TO ARTICLE III, PAYMENT

For the Basic Services performed by the CONSULTANT under Section 1 of this Amendment, compensation from the OWNER shall be computed on the basis of a Cost Not to Exceed contract to be paid by monthly invoice at the schedule of standard charges provided in Attachment B of the original agreement. This amendment increases the original contract amount by Three Hundred Four Thousand One Hundred and Fifty Dollars ($304,150) from Three Million Three Hundred Thirty Two Thousand Eight Hundred Fifty Seven dollars ($3,332,857.00) to a not to exceed amount of Three Million Six Hundred Thirty Seven Thousand Seven Dollars ($3,637,007).

IV. AMENDMENT TO ARTICLE IV, MISCELLANEOUS PROVISIONS

Alabama Code Section 31-13-9

By signing this contract, the contracting parties affirm, for the duration of the agreement, that they will not violate federal immigration law or knowingly employ, hire for employment, or continue to employ an unauthorized alien within the State of Alabama. Furthermore, a contracting party found to be in violation of this provision shall be deemed in breach of the agreement and shall be responsible for all damages resulting therefrom.
ARTICLE VI

IN WITNESS WHEREOF, the Parties have hereunto affixed their signatures, CDM Smith Inc. on the _____ day of _____________ 2016, and the OWNER on the _____ day of _____________ 2016.

BE IT RESOLVED BY THE JEFFERSON COUNTY COMMISSION that the President is authorized to execute an Agreement between Jefferson County, Alabama and Deputy District Attorneys Lauren Breland, Blair Shores and Nicholas Rayburn - Birmingham Division to forward County compensation/benefits to the Office of Prosecution Services.

PAYROLL AUTHORIZATION

RECITAL:

Alabama law requires Jefferson County to pay specified annual compensation to the Birmingham and Bessemer District Attorneys and their Deputies. The law also requires the State to pay a portion of the compensation for the District Attorneys and for some of the Deputy District Attorneys. Where the compensation responsibility is divided between the County and the State, the Attorneys' pension membership is also divided between the County pension and the State pension. Through this Payroll Request, the parties establish that the requesting Deputy District Attorney has authorized to have the County provide compensation, pension contribution and health insurance amounts for single or family coverage paid directly to the Office of Prosecution Services (OPS) and merged with the State provided compensation and paid to the Deputy District Attorney on the OPS payroll so that the entire compensation may be considered for the State pension.

WITNESSETH:

IN CONSIDERATION OF THE PREMISES, Jefferson County (the County), the District Attorney and the Deputy District Attorney agree as set out below:

Definition: as used herein the term "County provided compensation/benefits" shall mean:

a) The respective salary amounts for DDA's established by legislative act (and as amended) applicable to the Birmingham and Bessemer District Attorneys' offices and directed to be payable by Jefferson County as salary compensation;

b) An amount equal to 3% of the salary compensation representing an employer pension match;

c) An amount equal to 75% of the amount paid by the State toward the cost of State health insurance for either single or family coverage elected by the DDA. *In accordance with past practice, the County shall include an amount for FICA upon the condition that the County will be reimbursed by the State.

1. By execution below, the Deputy District Attorney hereby authorizes to have his County provided compensation paid directly to the Office of Prosecution Services and merged with his State-provided compensation and paid to him on the OPS payroll.
2. By execution below, the District Attorney hereby endorses and approves the above authorization of the Deputy District Attorney.

3. The County hereby agrees to make the quarterly payments in advance, no later than the 10th day of the months January, April, July and October of each year, of the County-provided compensation/benefits, directly to the Office of Prosecution Services for merger with the State-provided compensation and paid to the deputy district attorney on the OPS payroll.

4. The amount initially to be paid by the County is set out on the attachment. Provided however, the amounts shall be automatically amended to reflect changes in the compensation to be paid by the County; i.e., step raises and promotions for Deputy District Attorneys and changes in insurance coverage and the amount paid by the State.

5. The effective date of this Agreement shall be __________, 2016.

IN WITNESS WHEREOF, the parties have executed this Agreement as reflected below.

NOTICE OF PROPOSED ACTION

BE IT RESOLVED BY THE JEFFERSON COUNTY COMMISSION that notice is hereby given that on July 14, 2016, at 9:00 a.m., during its regularly scheduled Commission Meeting, the Jefferson County Commission will have a public meeting, to consider, discuss, vote upon, and take action on the adoption of a Resolution and Development Agreement authorizing and approving the use and grant of public funds to assist ServisFirst Bank ("ServisFirst"), under which the County will provide financial incentives to ServisFirst for business development and expansion. ServisFirst plans to relocate its corporate headquarters and construct an office building located in the City of Homewood, Alabama (“Project Site”) which is located within Jefferson County. The public funds to be granted to ServisFirst will consist of a payment by the County of $40,000 contingent upon ServisFirst meeting expected employment goals as mutually agreed.

The expenditure of public funds will serve a valid and sufficient public purpose. For purposes of Amendment 772 to the Constitution of Alabama of 1901, the entity to whom or for whose benefit the County proposed to lend its credit or grant funds or things of value is ServisFirst.

Notice of this public meeting is being published pursuant to the requirements of Amendment 772 to the Constitution of Alabama of 1901 (also known as Section 94.01 of the Constitution of Alabama of 1901), as amended, and all other applicable laws, to the extent applicable.

Motion was made by Commissioner Brown seconded by Commissioner Bowman that the above resolution be adopted. Voting “Aye” Bowman, Brown, Carrington, Knight and Stephens.

Thereupon the Commission Meeting was recessed.
