BE IT RESOLVED BY THE JEFFERSON COUNTY COMMISSION that the President be, and hereby is, authorized to execute the Amendment to the Agreement dated April 19, 2011 to Provide Professional Engineering Services for Total Phosphorus Removal and Wet Weather Management - Design Phase, Trussville WWTP between Jefferson County and CDM Smith, Inc. This Amendment increases the contract value by $465,000 to an amended total of $1,153,700.00.

SUPPLEMENTAL AGREEMENT TO AGREEMENT TO PROVIDE PROFESSIONAL ENGINEERING SERVICES FOR TOTAL PHOSPHORUS REMOVAL AND WET WEATHER MANAGEMENT – DESIGN PHASE, TRUSSVILLE WWTP

This SUPPLEMENTAL AGREEMENT is hereby included as an amendment to and incorporated as part of the AGREEMENT TO PROVIDE PROFESSIONAL ENGINEERING SERVICES FOR TOTAL PHOSPHORUS REMOVAL AND WET WEATHER
MANAGEMENT – DESIGN PHASE, TRUSSVILLE WWTP made on April 19, 2011, between John S. Young, Jr., LLC, Receiver, as Party of the First Part, and CDM Smith Inc, (formerly Camp Dresser & McKee Inc. or CDM) as Party of the Second Part, hereinafter referred to as the CONSULTANT.

The original agreement (April 19, 2011 Agreement) for this project included design of the Phase I improvements identified in the April 2011 TMDL Compliance Master Plan. However, during the execution of the preliminary design work it became evident that due to the short period of time between the Alabama Department of Environmental Management (ADEM) compliance dates for the Phases I and Phase II effluent phosphorus limits, the design and construction of Phase II improvements should occur simultaneously with the Phase I improvements. It was determined that there would be cost savings to the County for taking advantage of the economy of scale that would occur by constructing both Phases under the same contract and would avoid having Phase II improvements under design while Phase I improvements are being constructed.

In addition, a much less expensive alternative for meeting the more stringent phosphorus limits was identified during the preliminary design. The resulting change in direction will save the County on the order of $4 million in construction cost and significant cost saving in annual operation and maintenance expenses. Some additional engineering cost was incurred in performing the evaluation and initial design work necessary for the CONSULTANT to identify and verify the feasibility and benefit of the new alternative. The preliminary design report incorporated the changes resulting from the items above.

This amendment addresses the changes in engineering services to incorporate the above changes. In addition, this amendment includes several other tasks, which are described in the scope of work below.

1. The Scope of Work of CONSULTANT that is described in Article I of the April 19, 2011 Agreement is amended and supplemented to provide design and bidding assistance for the facilities and improvements described in the November 15, 2011 Trussville WWTP Preliminary Design Report (PDR) prepared by the CONSULTANT.

Additions to the scope of work from the original agreement included in the PDR include:

- A polymer feed system for settling and filtration,
- One additional automatic backwash filter,
- A solids dewatering system (belt filter press or screw press, polymer storage and feed system, and an associated building),
- Replacement of existing thickener pumps,
- A flow metering and flow control system to feed belt presses or screw presses from thickener recirculation line,
- Plant water pumping system modifications (not designed to meet fire protection requirements),
- Elimination of the BioMag system, and
- Associated civil and site plan revisions.

2. In addition to the design work described in the PDR, the Agreement is amended to include the following efforts:

- Preparation of flood plain and site development permit applications for submittal to Jefferson County Land Development and Zoning and response to one set of subsequent comments.
- The County requested that the CONSULTANT evaluate the use of screw presses instead of belt filter presses for sludge dewatering. This task will include setting up a site visit to a facility that is currently using screw presses and comparison of screw presses against a belt press, including life cycle cost differences. This scope does not include the cost for revision of the PDR or additional final design efforts (if necessary) if screw presses are selected for implementation.
- The evaluation of the use of a screw press instead of belt filter presses for sludge dewatering shows that using a screw press would result in long term savings of at least $94,000. Consequently, the County requested that CONSULTANT revise the design to a screw press. This task will include revision of the preliminary design and assistance with obtaining proposals for screw press equipment. Final design of screw press is included in scope and fee.

3. The responsibility of COUNTY as described in Article I – Section 2 of said Agreement are amended and supplemented as follows:
- None.

4. The time period for the performance of CONSULTANT's services as set forth in Article II of said Agreement are amended as follows:
- The CONSULTANT agrees to complete the Final Detailed Design and be ready to Advertise the project for bidding within 196 calendar days from execution of this Supplemental Agreement as follows:

5. The method of payment for services rendered by ENGINEER shall be as set forth below:
- For the Basic Services performed by the CONSULTANT under Section 1 of this Amendment, compensation from the COUNTY shall be computed on the basis of a Cost Not to Exceed contract to be paid by monthly invoice at the schedule of standard charges established in the AGREEMENT. This amendment shall increase the maximum engineering cost of $688,700 by $465,000 for a total not to exceed amended total contract amount of one million one hundred thirty eight thousand seven hundred dollars ($1,153,700.00).
6. COUNTY has established the following special provision and/or other consideration or requirements in respect to the Assignment.

   · None.

IN WITNESS WHEREOF, the Parties have hereunto affixed their signatures, CDM Smith Inc. the _____ day of __________ 2012, and W.D. Carrington, President, Jefferson County Commission, Alabama on the _____ day of __________ 2012.

The Sponsor shall provide a copy of each solicitation (Invitation for Bids, Request for Quotations or Request for Proposals), bid abstract and the awarded contract to the NRCS District Conservationist (DC) in the county where the work is performed and the NRCS Government Representative (GR) identified in Section C. Any costs incurred prior to full execution of this Agreement will be ineligible for reimbursement.

2. Ensure that equipment is not operated in streams, on stream banks, or in waterways in the course of performing the Works. Should Sponsor operate equipment or allow equipment to be operated in streams or waterways, NRCS may immediately terminate this Agreement and its obligation to make any payments to Sponsor.

3. Ensure that contractors limit work to repairs and/or debris removal resulting from the 2011 Tornadoes.

4. Designate an individual (Project Liaison) to serve as liaison between the Sponsor and NRCS and identify that person to NRCS in writing along with a list of his or her duties, responsibilities and authorities.

5. Provide certification that real property rights have been obtained for the Works. Certification must be provided on Form SCS-ADS-78, Assurances Relating to Real Property Acquisition (attached and incorporated as Exhibit A) and supported by an attorney's opinion attached to the form. The Sponsor shall provide such certification prior to issuing any solicitation for the installation of the Works. The Sponsor shall accept all financial and other responsibility for excess costs resulting from its failure to obtain, or its delay in obtaining, adequate land and water rights, permits and licenses needed for the Works.

6. Provide in-kind contributions (material, non-reimbursable labor, equipment costs) and/or cash contributions in an amount equal to at least 10 percent of the actual total installation costs identified in Section A. Actual total installation costs means the amount of contracts awarded plus eligible Sponsor in-kind contributions. The Sponsor's administrative costs (such securing land rights and permits, attending meetings and reviewing documents and works in progress) are not eligible in-kind contributions. The estimated value of Sponsor's required contribution is $10,403.

7. Provide all technical services necessary to complete surveys, designs, plans, specifications, a Quality Assurance Plan (QAP), construction inspection, contracting activities and administration. The engineer responsible for final approval of plans and specifications (Sponsor's Professional Engineer) must be registered in the State of Alabama. NRCS may reimburse the Sponsor for actual technical services costs in an amount equal to nine (9) percent of the actual total installation costs, but not to exceed nine thousand, three hundred sixty-six dollars ($9,363). Actual total installation costs means the amount of contracts awarded plus eligible Sponsor in-kind contributions. 10. Upon receiving NRCS comments, prepare the final design, construction specifications and drawings in accordance with standard engineering principles, the design parameters set during the predesign conference and the QAP. The Sponsor shall submit one set of the final plans and specifications - signed and seal approved by the Sponsor's Professional Engineer - as well as the QAP to NRCS for review and written concurrence prior to solicitation for the Works.

11. Provide construction inspection in accordance with the QAP.

The Sponsor will advise, consult with, and obtain proper written concurrence of NRCS on any such matters in which NRCS could have a financial interest.

17. Pay contractors as provided in their contracts. Within thirty (30) days of construction completion, submit a Request for Reimbursement, Standard Form (SF)-270 (attached and incorporated as Exhibit E) to the GR. The Sponsor must submit a separate SF-270 for each agreement entered, as applicable, and accept payment via electronic funds transfer.

18. Arrange for and conduct final inspection of the Works. The GR, Sponsor's Project Liaison and the Sponsor's Professional Engineer shall participate in the final inspection. 19. Upon completion and acceptance of all work, when provided by the terms of the contract, obtain a written release from the contractor of all claims against the Sponsor arising by virtue of the contract, other than claims in stated amounts as may be specifically accepted by the contractor.

21. Retain all records dealing with the award and administration of the contract for three years from the date of the Sponsor's submission of the final Request for Reimbursement or until final audit findings have been resolved, whichever is longer. Comply with the requirements contained in the document titled "Special Provisions -Construction" (attached and incorporated as Exhibit F), which includes the nondiscrimination provisions of Form SCS-AS-83, the Equal Opportunity Clause and the Notice to Sponsor of Requirement for Certifications of Nonsegregated Facilities. Ensure that all contracts for construction include the provisions contained in Exhibit D and F to this agreement.

4. In the event of default by a construction contract awarded pursuant to this Agreement, any additional funds properly allocable as construction costs required to ensure completion of the job are to be provided in the same ratio as construction funds are contributed by the parties under the terms of this Agreement. Any excess costs including interest resulting from a judgment collected from the defaulting contractor, or his or her surety, will be prorated between the Sponsor and NRCS in the same ratio as construction funds are contributed under the terms of the Agreement.
