BE IT RESOLVED BY THE JEFFERSON COUNTY COMMISSION that the President be, and hereby is, authorized to execute an Agreement between Jefferson County, Alabama and Atkins North America, Inc., for professional services in the amount of $365,500.00 to provide GPS survey and digital photographs of approximately 8,000 sanitary sewer manholes.

2012 Agreement For Professional Services For the Engineering Survey of Sanitary Sewer Manholes (Number 1)

This AGREEMENT, made this the day of , 2012 by and between Jefferson County in the State of Alabama as Party of the First Part, hereinafter referred to as the COUNTY, and Atkins North America, Inc., as Party of the Second Part, hereinafter referred to as the CONSULTANT.

WHEREAS, the said CONSULTANT has agreed and by these presents does agree with the COUNTY for the consideration hereinafter mentioned with payment to be administered by the COUNTY to provide various engineering services associated with the Jefferson County Environmental Services Department Consent Decree Compliance and Capacity Assurance, Management, Operations and Maintenance (CMOM) programs.

NOW, THEREFORE, for and in consideration of the mutual covenants hereinafter stipulated to be kept and performed, it is agreed between the parties as follows:

ARTICLE I - SCOPE OF WORK

The goals of the COUNTY and CONSULTANT under this AGREEMENT are to complete Global Positioning System (GPS) or conventional engineering survey of 8,000 sanitary sewer manholes located in the mini-systems described by the COUNTY in the Notice-To-Proceed. The COUNTY will provide a PROJECT area encompassing enough locatable manholes for CONSULTANT to complete the quantity described above. CONSULTANT will collect northing and easting coordinates, rim elevation, invert elevations, directional bearings of entering and exiting pipes, material and diameter of entering and exiting pipes and digital photograph of located manholes. The engineering survey information gathered during the PROJECT will provide the COUNTY with accurate locations for each manhole and pipe end elevations for connected sewer lines.

Northing and easting coordinates and rim elevation information for each located manhole will be gathered using specialized Real-Time Kinematic Global Positioning System (RTK GPS) equipment of survey-grade accuracy, wherever possible. Where measurements cannot be made with GPS equipment, coordinates will be derived from measurements made with conventional surveying methods. Invert elevation information will be derived by measuring from the rim to each pipe invert with a grade rod, compensating for rod angle or other acceptable methods as approved by the COUNTY. CONSULTANT will maintain a project information management system to facilitate the incorporation of all data collected during the PROJECT into SIMS.

Upon completion of the PROJECT, the coordinate information, invert elevations, and digital photographs will be incorporated into the COUNTY'S Sewer Infrastructure Management System (SIMS) by the COUNTY'S Information Technology Department, providing managers, engineers, and maintenance staff access to accurate and complete collection system asset information.

The CONSULTANT, in the accomplishment of work under this AGREEMENT, shall meet the requirements for conformance with the standards and practices of the Jefferson County Environmental Services Department.
Specifically excluded from the scope of work under this AGREEMENT is any actual construction, repair, renovation or maintenance of any component of the COUNTY’S sewer system by the CONSULTANT.

SECTION 1 - OBLIGATION OF CONSULTANT TO COUNTY

Under this AGREEMENT, the CONSULTANT will provide the following engineering services:

A. For each COUNTY sewer manhole in the PROJECT area as currently depicted in SIMS, which can be located with reasonable effort by CONSULTANT (to a maximum of 8,000 manholes), collect coordinates in the X, Y and Z planes (northing, easting, and rim elevation) using specialized Real-Time Kinematic Global Positioning System (RTK GPS) equipment wherever possible. Obtain coordinate information from the center of each manhole cover.

B. Where measurements cannot be made with GPS equipment, derive coordinates from measurements made with conventional surveying methods, referenced from the nearest manhole for which GPS data was collected.

C. Measure the directional bearing to, and depth from the manhole rim of, all sanitary sewer lines entering or exiting each manhole.

D. Manholes which are indicated in current COUNTY information (e.g., in SIMS) to exist but which CONSULTANT cannot locate with reasonable effort will be designated as "CNL" (Could Not Locate) for subsequent investigation by the COUNTY or others. Manholes which are designated as "CNL" (Could Not Locate) shall not be included in the agreement total number of manholes surveyed.

E. Incorporate the COUNTY’S current manhole numbering system into the data collection process.

F. Validate the information collected with QA/QC data checks to minimize errors or inconsistencies.

G. Take representative digital photographs of interior of each manhole and exterior of each manhole cover including an identifiable immobile background feature (e.g. a house or other structure). Label each photograph with identification information including mini-system, manhole number, and compass direction of the photograph. Name each electronic file with the corresponding Photographs to be incorporated into SIMS by the COUNTY’S IT staff.

H. Develop a composite drawing of all surveyed manholes and connecting pipes in the PROJECT area in ArcMap 9.3 or ArcMap 9.3.1 and based upon State Plane Coordinates for West Alabama (NAD 1983 State Plane Alabama West).

I. Prepare a PROJECT final report indicating the work performed.

J. Provide the following deliverables to the COUNTY:

1. Database in Microsoft Access format of all validated survey information, including manhole number, manhole material, northing, easting, rim elevation, end elevation, upstream and downstream invert of each pipe entering or exiting the manhole, the directional bearing of each pipe entering or exiting the manhole and the diameter and material of each pipe entering or exiting the manhole; database format shall be compatible with SIMS. Submit an incremental database with each monthly application for payment, and a complete cumulative database upon project completion.

2. Interior and exterior digital photograph file, in JPEG format, of each manhole surveyed. Label each digital photograph with identification information including mini-system, manhole number, and compass direction of photograph. Name each photograph electronic file with the manhole number. Submit photographs in conjunction with each monthly application for payment.

3. A Final Report of the PROJECT indicating the work completed, upon PROJECT completion. The final report should list manhole ID number of all structures attempted to be surveyed. The list will contain a list of manholes located buried under soil, asphalt or are otherwise obstructed.

K. Hold periodic meetings with COUNTY staff, as required.

SECTION 2 - OBLIGATION OF THE COUNTY TO THE CONSULTANT

It is understood that the COUNTY will:

A. Identify work areas (mini-systems) with a total number of manholes sufficient to accommodate the PROJECT scope established in this AGREEMENT, making allowance for manholes indicated but which are buried, inaccessible or do not exist. Designate a backup area (mini-system) in which CONSULTANT may work if the number of accessible manholes in the initial work area is less than the total established in the PROJECT scope.

B. Assist the CONSULTANT by placing at their disposal all available information pertinent to the requirements described above.

C. Designate a project manager to coordinate CONSULTANT’S work and to assist as COUNTY’S representative with respect to the work to be performed under this AGREEMENT.

D. Provide access to and make all provisions for the CONSULTANT to enter upon public and private lands as required for the CONSULTANT to perform its work under this AGREEMENT.

E. Pay for appearances before courts or boards regarding litigation related to the AGREEMENT and/or preparatory work required in connection with such matters. Appearance before courts or boards regarding litigation related to errors or omissions of the CONSULTANT which result in legal proceeding against the COUNTY shall not be charged to the COUNTY and shall not be items eligible for payment by the COUNTY.

F. Examine studies, reports, sketches, opinions of probable cost of construction, proposals, and other documents presented by the
CONSULTANT, and render decisions in writing pertaining thereto within a reasonable time so as not to delay the services of the CONSULTANT.

G. Give prompt written notice to the CONSULTANT whenever the COUNTY observes, or otherwise become aware of, any defect in the performance of engineering services.

H. Assume all costs of public hearing, if required.

SECTION 3 - CONFERENCES AND VISITS TO SITE

Conferences will be held at the request of either the COUNTY or the CONSULTANT to discuss matters pertinent to any phase of the AGREEMENT, subject to the CONSULTANT hourly rates defined herein.

Request for visits may be made by the COUNTY or by the CONSULTANT in conjunction with any other party or parties.

ARTICLE II - TIME OF BEGINNING AND COMPLETION

A. The CONSULTANT agrees to start work on the Engineering Services outlined under Article I of this AGREEMENT within fourteen (14) days after receipt of written notice from the COUNTY to proceed. The COUNTY will not notify the CONSULTANT to commence work until this AGREEMENT has been formally approved by both parties.

B. The CONSULTANT agrees to provide its Summary Report and all GPS data within five-hundred -sixty (560) days after receipt of written notice from the COUNTY to proceed.

C. In case the COUNTY deems it advisable or necessary in the execution of the work to make any alteration which will increase or decrease the scope of work outlined in this AGREEMENT, the time limits specified herein may be adjusted in accordance with Article IV, Section 1.

D. At or near the completion of this agreement, the COUNTY and the Consultant may decide at the COUNTY'S option to extend the scope of work and time of the agreement. This extension will have the same terms as the initial agreement and may be extended for a maximum of three additional years. The Decision to extend the agreement will reoccur at or near the completion and close of each current agreement.
