Commissioner Sandra Little Brown’s statement.

In my absence, during a Jefferson County Commission Committee meeting on September 4, 2012 the Commission, by a majority vote voted out of committee a proposal to transition from the current Cooper Green Mercy Hospital model to a different delivery system known as the “Hub and Spoke” model. As I have previously stated, I prefer the process that was detailed in the Request for Proposal to Review Various Alternative Models for Indigent Healthcare in Jefferson County, refer on page 2 - Scope of Service. If I remembered correctly it was advanced by and distributed to all the Commissioners by Commission President David Carrington. I am not prepared to support this action by the majority of the Commissioners to propose adoption of this model at this time.

Furthermore the process that was mention in this RFP seems to be void any alternatives and as well, any stakeholders other than the Commissioners and Mr. Michael’s participation. In fact it has come to my attention, that some Commissioners have had discussions with various healthcare providers concerning alternatives which other Commissioners have not been made aware of. The model needs to be acceptable to all parties affected.

With regards to the process Mr. President, let me read excerpts from the document which proposes the model that is the subject of the pending resolution:

Assumptions (at page 10):

Mr. President, there currently is no consensus concerning any model because this Commission has not allowed for any broad public input nor has it adopted a process under which such consensus could be obtained, the only consensus it appears is the consensus of the majority of this Commission.

Further you certainly can’t claim that the proposed model is culturally sensitive to the community or Cooper Green since there has been no formal or public presentation of the proposed model to these groups. And the Commission has certainly not provided an opportunity for stakeholder input or consideration of alternative models.

Mr. President, what is it that the majority of this Commission know that others on the Commission don’t know? I particularly want to know who members of this Commission or other county officials are meeting with, in which there are discussions about selling some of the beds at Cooper Green.

It appears to me that the majority of this Commission is in a rush to dismantle Cooper Green Hospital without a reasonable and acceptable alternative being in place and other healthcare providers are already rushing in to pick the flesh from the carcass before it is even dead.

I can’t and won’t support the Commission’s actions as they are currently proposed.

Also Mr. President, I was advised that you inferred that the Hub and Spoke model had been endorsed by members of the Jefferson County Delegation. However after speaking to some members it is my understanding when this model was presented to the delegation some of the members that were in attendance did not endorse this model but stated that the delegation needed to discuss it further with their constituents.

This would be more consistent with the process I have stated earlier and which I still support. We have not utilized the process which we all can support.
Additionally, at this same committee meeting the Commission proposed the adoption of a second resolution providing for a team to be comprised of Commissioners and healthcare providers to develop in-patient transfer agreements with area hospitals. Again, I prefer for this process to work similar where our County Manager’s office will work in conjunction with indigent healthcare providers and consultants with expertise in the areas of Medicare and Medicaid Compensations for healthcare services provided. Once completed this team would submit their findings and recommendations to the Commission for its consideration for adoption.

I am therefore not prepared at this time to neither vote in support of these pending resolutions nor agree to serve as a member of the transition team. I am committed to maintaining a full-service hospital with modifications of services and new efficiencies that can sustain itself without any dependency on the County's General Fund. Should this not be the case, I am for a seamless, uninterrupted transition to an alternative model that would meet the current and future needs of the indigent population in Jefferson County Alabama. However, I offer a substitute resolution to the pending resolution and it reads as follows: (copy originally not given to Minute Clerk - later received and has been made part of the September 11th Minutes and appear at the end of the Minutes)

AMENDMENT NO. 1
TO AGREEMENT TO PROVIDE ENGINEERING SERVICES FOR THE VILLAGE CREEK WASTEWATER TREATMENT PLANT
WASTE GAS ENERGY AND PLANT OPTIMIZATION IMPROVEMENTS PROJECT
This is an Amendment to the Contract by and between Jefferson County, Alabama through the Environmental Services Department, hereinafter called "the OWNER" and Hazen and Sawyer, P.C., hereinafter called "the CONSULTANT" to provide engineering services related to the Village Creek Wastewater Treatment Plant.

WITNESSETH:

WHEREAS, the OWNER agrees that additional work was necessary to complete the detailed design of the project under the provisions of ARTICLE IV – MISCELLANEOUS PROVISIONS, SECTION 1 – CHANGES OF WORK; and

WHEREAS, the CONSULTANT agrees that less work is necessary to complete the bidding and construction services under ARTICLE IV – MISCELLANEOUS PROVISIONS, SECTION 1 – CHANGES OF WORK; and

WHEREAS, the OWNER desires to amend the contract; and

WHEREAS, the CONSULTANT wishes to amend the contract.

NOW, THEREFORE, in consideration of the above, the parties hereto agree as follows:

I. AMENDMENT TO ARTICLE I – SCOPE OF WORK

Amend Article I – Scope of Work, Section 1 – Obligation of the CONSULTANT to the OWNER to include the following engineering services:

1. Development of Immediate Needs Bidding Documents – Assemble plans and specifications for bidding purposes for a new Immediate Needs construction contract of the following upgrades:
   - Replacement of carriages and bar racks in the Plant 001 headworks.
   - Rehabilitation of Final Settling Tanks No. 4 thru No. 11 with the following exceptions: Design drawings will be modified to delete requirements to sandblast and repaint bridges, delete requirements to replace broken sluice gates, and delete wireless controls. All other provisions pertaining to the Final Settling Tanks will remain as designed.
   - Replacement of piping in Chlorine/Sulfur Dioxide Building.
   - Hardwired control of gates at UV Disinfection.
   - Dewatering Building Polymer System Upgrade.
   - Replace existing Bristol Babcock 3300 RTUs on Plant 001 with new PLCs.

   CONSULTANT shall prepare draft design documents for the Immediate Needs Project for OWNER's review. CONSULTANT will incorporate OWNER's comments and issue final design documents for bidding purposes.

   Since the OWNER does not intend on bidding and constructing the Waste Gas Energy Recovery and Process Optimization Improvements project in the near term, the CONSULTANT shall archive the Waste Gas Energy Recovery and Process Optimization Improvements Project 100% submittal along with any comments received from OWNER. To save the OWNER engineering costs, the 100% submittal for the Waste Gas Energy Recovery and Process Optimization Improvements Project will not be revised to reflect that the aforementioned Immediate Needs have been removed from the final design.

2. Dewatering Building Evaluation and Design – Troubleshooting issues related to the dewatering building and developing narrative descriptions and relevant details of recommended remedies were not included in the CONSULTANT's original scope of work. In accordance with the scope of work of this amendment, CONSULTANT shall assist the OWNER with the identification and categorization of deficiencies associated with dewatering building such that remedy of deficiencies deemed suitable for bidding within current budgets can be included in the aforementioned Immediate Needs Project.

   Anticipated activities are as follows:
   - On-Site Dewatering Facility Process Evaluation – This subtask includes an interactive evaluation conducted on-site. Day 1 of the evaluation will include a half-day, class-room workshop to identify and document OWNER's grievances with the dewatering facility, OWNER's standard operating procedures, and maintenance practices pertaining to dewatering. It is anticipated that simplification of the controls for the dewatering operations will be developed during this workshop.
   - The remainder of Day 1 and all of Day 2 will be spent in the field evaluating individual systems (i.e., WAS transfer pumps, centrifuge feed pumps, centrifuges, sludge hoppers, cake conveyors, cake pumps, alkaline stabilization lime feeder, polymer makeup and feed, etc.) to determine if systems are operating at their intended design conditions.
   - Deficiencies will be identified and categorized as follows:
     a. Items recommended to be addressed by the OWNER's internal crews and forces
     b. Items recommended to be addressed outside the scope of the upgrade project
     c. Items requiring additional investigation by a startup/trouble-shooting expert
     d. Items recommended to be included in the Immediate Needs Project scope of work

   CONSULTANT's operations specialist, an experienced startup/I&C/electrical troubleshooting technician, and a programming
specialist from Troy Systems Integration Group (TSIG) will spend Days 3 and 4 evaluating in detail those items categorized as requiring additional investigation. CONSULTANT will trouble-shoot issues to determine if cost-effective remedies are applicable to restore the intended functionality. CONSULTANT will submit field reports describing each item tested with recommended next step for improvement.

- Dewatering System Repair Performance Specification - Shortly after the workshop, CONSULTANT will schedule and conduct a teleconference with OWNER to review findings. The purpose of the teleconference will be to determine the recommendations that OWNER desires that CONSULTANT include in the aforementioned Immediate Needs construction contract. Items which can be adequately described in narrative format will be included in a performance-based specification to be included in the construction contract.

- Items which cannot be adequately described in narrative format and require detailed design drawings or multi-discipline coordination are not included in this amendment, and may be included in a future amendment if OWNER elects to pursue.

3. Dewatering System Repair Performance Specification - Shortly after the workshop, CONSULTANT will schedule and conduct a teleconference with OWNER to review findings. The purpose of the teleconference will be to determine the recommendations that OWNER desires that CONSULTANT include in the aforementioned Immediate Needs construction contract. Items which can be adequately described in narrative format will be included in a performance-based specification to be included in the construction contract.

- Items which cannot be adequately described in narrative format and require detailed design drawings or multi-discipline coordination are not included in this amendment, and may be included in a future amendment if OWNER elects to pursue.

4. Digester Gas Piping System Detailed Design – Design of a new digester gas piping system was not included in the CONSULTANT’s original Scope of Work. As requested by OWNER, CONSULTANT provided additional detailed design services for replacement of the existing underground digester gas piping system between the digesters and the new iron sponge system and existing waste gas burner as part of the Waste Gas Energy Recovery and Process Optimization Improvements Project.

4. Modifications to Primary Scum System and Automation - As requested by the OWNER, CONSULTANT deleted the new primary scum pumping systems from its final design documents and included rehabilitation of valves and controls for automatic removal of scum from the primary clarifiers utilizing the existing scum system. Additional engineering related work was required to modify the design drawings and specifications to eliminate the scum pumping systems and add requirements to replace valves and automate controls.

5. Revisions to Improvements included in the Final Design for Waste Gas Energy Recovery and Process Optimization Improvements Project – Requirements under Paragraph 3 of Exhibit B – Scope of Work are modified as follows:
   a. Delete requirement to provide a stilling basin upstream of UV disinfection.
   b. Revise requirement to "Add a dryer on lime intake compressor system at alkaline stabilization" to "Reroute piping to add long radius bends on lime feed piping at alkaline stabilization."
   c. Delete requirement to "Rehabilitate and repair existing dewatering cake pumps or install alternative conveyance system to eliminate need for cake pumps."
   d. Delete requirement to "Replace Centrifuge #3 or assist Owner in the procurement of two belt filter press dewatering units."
   e. Add requirement to assist OWNER in the RFP development, evaluation, selection and negotiation of standardized HMI software package.

   m. Add requirement to assist OWNER with development of RAS pump specification for bidding purposes.

6. Bid Period Services - In place of performing the Bid-Period Services as described in the original scope of work for the Waste Gas Energy Recovery and Plant Optimization Project, CONSULTANT shall provide Bid-Period Services for the Immediate Needs Project described in Item 1 above.

7. Construction (Office) Services - In place of performing the Construction (Office) Services as described in the original scope of work for the Waste Gas Energy Recovery and Plant Optimization Project, CONSULTANT shall provide Construction (Office) Services for the Immediate Needs Project described in Item 1 above.

8. Construction (Field) Services – Delete requirement to provide a full-time resident project representative. OWNER may provide periodic construction observation using its own forces. CONSULTANT shall provide periodic, on-site specialty inspections as deemed necessary. A maximum of 36 discipline specific specialty visits are included.

9. Operational Assistance and Startup Support Services - In place of performing the Operational Assistance and Startup Support Services described in the original scope of work for the Waste Gas Energy Recovery and Plant Optimization Project, CONSULTANT shall provide similar services with the following exceptions:

WHEREAS, Sunday morning, August 26, 2012, the Siemens 480.0 volt busbar system feeding from transformer IA to the low voltage distribution equipment at the Five Mile Creek WWTP catastrophically failed completely shutting off utility and stand-by power delivery to the influent and intermediate pump stations and caused power interruption to critical treatment processes. WHEREAS, the replacement of the failed busbar system, repair of the structural supports, and the testing of the other busbar systems in the vicinity of the explosion is required to bring the Five Mile Creek WWTP to full capacity for the treatment of high flows expected with rainfall from Tropical Storm Isaac or other future storms; and

WHEREAS, if not repaired immediately, this lack of electrical distribution capacity poses a threat to the health, safety, convenience and welfare of the community and may cause potential regulatory violations.

NOW THEREFORE BE IT BY THE JEFFERSON COUNTY COMMISSION that pursuant to the Alabama competitive bid law statute § 41-16-53 an emergency exists therefore suspending the usual and customary requirements of said bid law. In light of said emergency, the Commission President is authorized to enter into a contract with Inline Electric Supply Co., PO Box 7267 Huntsville, AL 35807 for the purchase of the needed electrical components and enter into a contract with Stone and Sons Electrical Contractors, 2530 Queenstown Road Birmingham, AL 35210 to perform the work necessary to return the electrical distribution to full capacity and reliability.

RE: Asphalt Unloading Pump
SAP Shopping Cart # 1*184702

DATE: August 24, 2012

The attached shopping cart (on file in the Minute Clerk’s office) is for a new Asphalt Unloading Pump which is used in the tank that holds the Liquid Asphalt to keep it heated and stirred as well as pumps it out into the trucks that are used to carry it to the jobsite(s).

The pump that is currently installed has quit working and is no longer repairable. If we do not have approval for an emergency purchase to get the pump here & installed ASAP, the Department will lose a considerable amount of liquid asphalt being held in the tank. If this happens this will be a costly process to replace not only the asphalt but to clean and repair any damages to the liquid asphalt tank.

The vendor is located in Chattanooga TN and has agreed to overnight the pump to us once the PO is received.

Thank you for your consideration in this matter, if you have questions please contact me at 325-5154.

Recommend for Emergency PO Approval:

Commissioner Brown’s Cooper Green Mercy Hospital substitute resolution:

WHEREAS, Cooper Green Mercy Hospital ("Cooper Green") relies on a Jefferson County Sales Tax, a Jefferson County Tax on Liquor and third party reimbursements for funding; and
WHEREAS, Cooper Green's expenditures have exceeded its revenues over the past several years; and
WHEREAS, the shortfall in funding for Cooper Green has been supplemented by the Jefferson County General Fund; and
WHEREAS, the Jefferson County Commission has reduced County General Fund expenditures in the current fiscal year by approximately $95 million by, among other things, reducing the County workforce by more than 800 employees, closing satellite courthouses and reducing services provided to the citizens of the County; and
WHEREAS, on or before October 1, 2012, the County must adopt a balanced budget for fiscal year 2013 which will require further reductions of General Fund expenditures; and
WHEREAS, the County owns and operates Cooper Green Mercy Hospital; and
WHEREAS, the Alabama Health Care Responsibility Act, Alabama Code §§ 22-21-290, et seq. (the "Act"), imposes limited financial responsibility on Alabama counties for the medical care of certain citizens under certain circumstances. Although, the Act does not require any county, including Jefferson County, to operate a hospital, Cooper Green Hospital has existed since 1972 and has operated as a department of the county for 29 years and a large number of indigent residents of the County has, and continues to rely on Cooper Green for services; and
WHEREAS, Cooper Green operates at a loss that has historically been subsidized by the General Fund reserves (including a cost to the General Fund of at least $10 million last year, not including $3.5 million in unpaid, past due invoices from last year paid in this fiscal year), and is projected to cost the General Fund a minimum of $6 million this year; and
WHEREAS, after careful consideration, the County Commission has determined that the current delivery system at Cooper Green is unsustainable; and further determined that it is in the best interests of the County, its citizens and taxpayers to modify or change Cooper Green's current healthcare delivery system to make it more effective and efficient; and further determined that transferring the current, fiscally unsustainable indigent healthcare delivery system into a Healthcare Authority is not a prudent alternative at this time; and although no alternative indigent healthcare model has been adopted, it appears that at this time only-two indigent healthcare alternatives are in consideration: developing an operating budget for Cooper Green that does not depend upon any support from the General Fund or transitioning to a 24-hour a day, 7-day a week, full service urgent care-center with expanded outpatient services with inpatient services being provided under negotiated agreements with others in the medical community.

NOW THEREFORE BE IT RESOLVED BY THE JEFFERSON COUNTY COMMISSION that in order to move the process forward, the County Manager is hereby authorized and directed to:

1). Develop with input from the Cooper Green staff and others as needed, a detailed FY 2013 operating budget not to exceed $70 million, for operation of a 50-bed hospital (exclusive of reserves, indirect cost allocations and any immediate capital needs) on or before Tuesday, September 25, 2012;
2). Appoint a transition team consisting of a representative from the medical community, the business community, the Cooper Green Advisory Board, the City of Birmingham, the Jefferson County Mayor's Association and other healthcare professionals as needed, to concurrently review both the 50-bed hospital model, the full service urgent care center model, and other alternative healthcare delivery models recommended by the Commission and others, as well as develop inpatient, transfer, and fee for service agreements with other community healthcare providers on or before October 30, 2012 for Commission consideration and action.
3). Conduct at least three public forums for presentation of the most cost effective, efficient, and viable healthcare delivery models to solicit stakeholder input and consensus consistent with the framework and timeline set forth in item 2 above.
4). Research, investigate and formulate a plan and process for transition of Cooper Green Hospital or its successor entity to a Healthcare Authority, including provisions for transfer of all employees then employed with the hospital or successor entity, and which also addresses all attendant personnel matters, rights and issues concerning seniority, pensions, etc.

BE IT FURTHER RESOLVED BY THE JEFFERSON COUNTY COMMISSION that the County Manager Petelos is authorized, with the signed consent of three commissioners, to expend public dollars for any reasonable professional services needed to accomplish the above tasks on or before November 1, 2012.

The Commission Meeting was re-convened and adjourned without further discussions or deliberations at 9:00 a.m., Tuesday, September 25, 2012.
